AGENTS CONVENED.

Voice agents, AI automation and full-stack software for clinics, local businesses and startups.

LIVE IN 14 DAYS. FIXED PRICE. HEAR IT FIRST.

Book a call
Hear a live agent

Answer calls | Follow up fast | Book the slot | Win back

Aria A caller rings after hours and wants an appointment

EXAMPLE CONVERSATION, NOT A RECORDING

LIVE DEMO

Talk to Aria yourself

Speak to the agent from your browser. Ask it to book you in. No sign-up needed.

Start the voice demo or book a call

01 Fixed scope
You know what you get before we start.

02 You own the code
Handover and training are part of every build.

03 Live in 14 days
A pilot is planned for 14 days, scoped up front.

SERVICES

From the first ring to the booked slot, one agent for each job

01

Voice agents that answer every call

Picks up in one ring, in the caller's language, and never puts anyone on hold.

How it works

Call answered EXAMPLE
Hi, I'd like to book a cleaning this week.
Of course. I have Thursday at 10:30 or Friday at 2.

New enquiry EXAMPLE
Do you have any appointments left today?
Yes, 4:15 pm is open. Want me to hold it for you?
Yes please.

02

Follow-up in seconds, not days

Every enquiry gets a reply while the lead is still looking at their phone.

How it works

03

Bookings straight into your calendar

The agent checks real availability and books the slot, with no back and forth.

How it works

This week EXAMPLE
Mon Tue Wed Thu Fri

Lapsed customers EXAMPLE
Last visit 9 months ago Returned
Last visit 11 months ago Texted
Last visit 14 months ago Returned
Last visit 9 months ago Unlocked

04

Reactivation of lapsed customers

Quietly reaches out to people who stopped coming, and brings the right ones back.

How it works

05

Reporting you can read in a minute

Calls answered, slots booked and revenue recovered, in one plain weekly summary.

How it works

Weekly summary EXAMPLE
Calls answered 128
Slots booked 41
Missed 3

SYSTEMS

Agents, automations and the systems behind them

01 Agents
Voice, follow-up, booking, reactivation, reporting agents.
Vapi LiveKit OpenAI

02 Automations
Workflows that move data between your tools and run on triggers.
n8n Webhooks Zapier APIs

03 ERP and CRM
Custom business systems: customers, orders, inventory, billing, POS.
Next.js FastAPI Postgres

04 Apps
Web and mobile apps with agent features; marketing sites included when needed.
Next.js React Native Flutter

05 Platforms
Multi-service systems with an event backbone and monitoring.
Dapr Kafka Kubernetes

See the studio

BUILT FOR

Made for teams who live on the phone

CLINICS
Calls go unanswered while the front desk is with a patient.
See how it works

MED SPAS
Enquiries arrive at night and are cold by morning.
See how it works

HOME SERVICES
The owner is on a job and the phone rings out.
See how it works

STARTUPS
You need an agent, an app or a platform and a team that ships.
See how it works

PROCESS

Three steps, no surprises

001 2 DAYS

AUDIT

We listen to a week of your calls and find where revenue leaks.

YOU GET A short audit write-up

002 7 TO 10 DAYS

BUILD

One agent, one job, wired into your phone line and calendar.

YOU GET A live agent you can call

003 WEEKLY

RUN

We monitor, tune and report every week. You keep the results.

YOU GET A one-page weekly summary

PRICING

Start small, scale when it works

PILOT

Prove it on one line

One agent, one job
A 14-day pilot, scoped up front

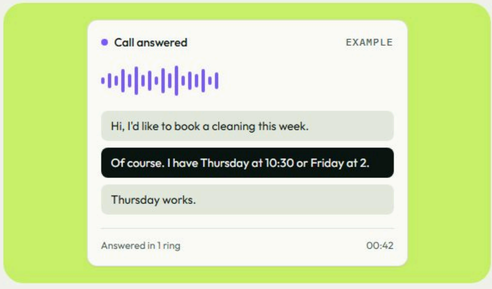
SERVICE 01

VOICE AGENTS THAT ANSWER EVERY CALL

Picks up in one ring, in the caller's language, and never puts anyone on hold.

THE PROBLEM

Calls that ring out are customers you paid to attract and then lost.



How a call flows

1. Caller rings your number
2. Aria answers in one ring and asks what they need
3. She checks real availability
4. The slot is booked and a text confirms it
5. Anything she cannot handle goes to a person with a summary

Works with

Twilio · Vapi · LiveKit · Google Calendar · Cal.com · Your CRM

Not on the list? If the tool has an API, we can usually connect it.

Price and timeline

Starts as a 14-day pilot. Scope and price are fixed on a call before any work begins, so there are no surprises.

Questions

- Will callers know it is an AI?
- Which languages?
- Are calls recorded?

Hear it on the demo page, then see the clinic case.

Next: Follow-up

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

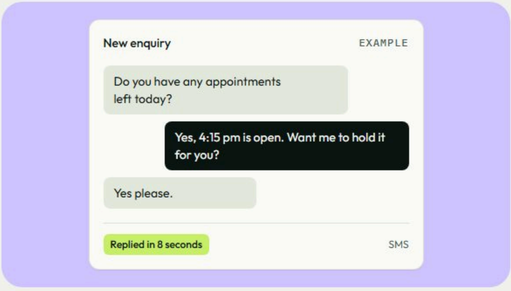
SERVICE 02

FOLLOW-UP IN SECONDS, NOT DAYS

Every enquiry gets a reply while the lead is still looking at their phone.

THE PROBLEM

An enquiry answered after an hour is usually an enquiry lost.



How a call flows

1. A form, message or missed call arrives
2. The agent replies within seconds in your tone
3. It answers the first questions and offers a slot
4. It keeps the thread going until a person is needed

Works with

WhatsApp SMS Email Web forms Instagram Your CRM

Not on the list? If the tool has an API, we can usually connect it.

Price and timeline

Starts as a 14-day pilot. Scope and price are fixed on a call before any work begins, so there are no surprises.

Questions

- Does it message people who did not ask?
- Can I approve messages first?
- What if the lead replies angrily?

Pairs with booking so the reply ends in a calendar slot.

Next: Booking

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

Book a call Hear a live agent

AGENTS, CONVEN

© 2026 Conclave AI

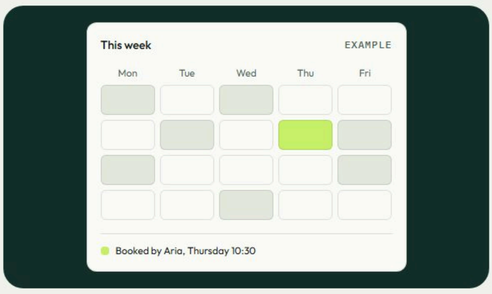
SERVICE 03

BOOKINGS STRAIGHT INTO YOUR CALENDAR

The agent checks real availability and books the slot, with no back and forth.

THE PROBLEM

Booking by back and forth costs minutes every time and loses people on the way.



How a call flows

1. The agent asks what and when
2. It reads your real calendar
3. It offers two or three slots
4. It books, confirms and reminds
5. It handles the reschedule too

Works with

Google Calendar · Outlook · Cal.com · Practice software · Stripe deposits

Not on the list? If the tool has an API, we can usually connect it.

Price and timeline

Starts as a 14-day pilot. Scope and price are fixed on a call before any work begins, so there are no surprises.

Questions

- Does it double-book?
- Can it take a deposit?
- What about staff holidays?

Built on the same calendar link as the voice agent.

Next: Reactivation

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

Book a call · Hear a live agent

AGENTS, CONVEN

© 2026 Conclave AI

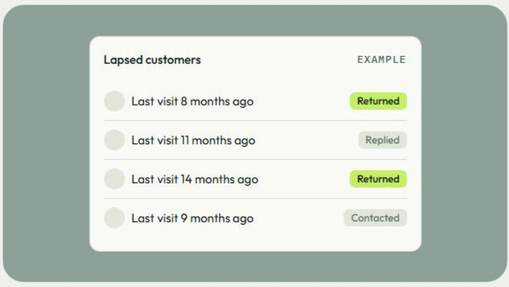
SERVICE 04

REACTIVATION OF LAPSED CUSTOMERS

Quietly reaches out to people who stopped coming, and brings the right ones back.

THE PROBLEM

Your best next customers are the ones who already came once and quietly stopped.



How a call flows

1. We pull a list of lapsed customers you choose
2. The agent writes a short personal message
3. People who reply are offered a slot
4. People who decline are never contacted again

Works with

CRM export · SMS · WhatsApp · Email · Cal.com

Not on the list? If the tool has an API, we can usually connect it.

Price and timeline

Starts as a 14-day pilot. Scope and price are fixed on a call before any work begins, so there are no surprises.

Questions

- Is this spam?
- How many messages go out?
- Can we exclude people?

The weekly report shows who came back.

Next: Reporting

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

Book a call · Hear a live agent

AGENTS, CONVEN

© 2026 Conclave AI

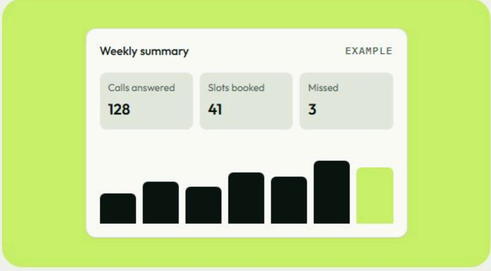
SERVICE 05

REPORTING YOU CAN READ IN A MINUTE

Calls answered, slots booked and revenue recovered, in one plain weekly summary.

THE PROBLEM

If you cannot read the results in a minute, you will stop reading them.



How a call flows

1. Every call, message and booking is logged
2. Each week the agent writes a plain summary
3. It names what worked and what to change
4. You get it by email on the same day each week

Works with

Resend email · Supabase · Looker Studio · Slack

Not on the list? If the tool has an API, we can usually connect it.

Price and timeline

Starts as a 14-day pilot. Scope and price are fixed on a call before any work begins, so there are no surprises.

Questions

- Which numbers are shown?
- Can I export the data?
- Who reads the report with me?

This is where the Receipts page gets its numbers.

Next: Voice agents

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

Book a call · Hear a live agent

STUDIO / AGENTS

AGENTS THAT TAKE THE CALLS

Calls that ring out and enquiries that wait are customers you paid to attract and then lost.

What we build

- Voice agents that answer, ask what is needed and book
- Follow-up that replies to every enquiry in seconds
- Booking against your real calendar
- Reactivation of customers who stopped coming
- A weekly report you can read in a minute

How it runs

1. A call or message arrives
2. The agent answers and asks what is needed
3. It checks your live calendar
4. It books, confirms and reminds
5. Anything it cannot handle goes to a person with a summary

Timeline, price and stack

STUDIO / AUTOMATIONS

WORKFLOWS THAT MOVE YOUR DATA

Your team re-types the same details between tools, and things fall through the gaps between them.

What we build

- Lead captured, then added to the CRM, answered and a task created
- Invoices and reminders sent on a schedule
- Reports assembled and emailed each week
- Alerts when something looks wrong
- Clean hand-offs between your apps

How it runs

1. A trigger fires (a form, an email, a payment, a schedule)
2. The data is checked and cleaned
3. The right tool is updated
4. The right person is told
5. Failures retry, then raise an alert

Timeline, price and stack

TIMELINE
1 to 2 week build

PRICE FROM
Scoped on a call, fixed before we start

STACK
n8n Webhooks Zapier APIs

Questions

- n8n, Zapier or code?
- What happens when a step fails?
- How long does a workflow take?

Pairs with Agents: an agent takes the call, an automation does the follow-through.

STUDIO / APPS

APPS WITH AGENT FEATURES

You need a product, or a site, that works on a phone and does something clever without a fragile pile of plug-ins.

What we build

- Web apps and dashboards
- Mobile apps in React Native or Flutter
- Agent features inside the app: copilots, search over your documents, tool use
- Marketing sites with a headless CMS, SEO and booking built in

What it is built with

Next.js — React Native — Flutter — FastAPI — Postgres

Built with these. The order shown is illustrative; a full architecture diagram is added with each write-up.

Marketing sites, when you need a face

Animated Next.js sites with a headless CMS, SEO and booking built in, scoped as one milestone and handed over so your team can edit them.

AGENTS, CONVEN

© 2026 Conclave AI

FOR HOME SERVICES

PICK UP WHILE YOU ARE ON THE ROOF

The owner is on a job and the phone rings out.

Three workflows we set up first

1. Answer, take the job details and book a visit
2. Send quotes and chase the reply
3. Summarise the week in one message

What the week looks like

A sample weekly summary for home services. Figures are examples to show the shape, not results.

Agents that do the work

01 Voice agents

02 Follow-up

03 Booking

04 Reactivation

05 Reporting

The usual objection

What about emergencies?

Language: we build in English, Arabic and Urdu. A real home services case is added with the first build in this field.

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

FOR STARTUPS

AGENT-FIRST SOFTWARE, BUILT LIKE A PLATFORM

You need an agent, an app or a platform and a team that ships.

Three workflows we set up first

1. Agent apps and copilots in weeks
2. Web and mobile products with agent features
3. Event-driven backbone when volume grows

What the week looks like

A sample weekly summary for startups. Figures are examples to show the shape, not results.

A week on a platform build EXAMPLE

Deploys	Alerts resolved
6	11
Agent runs	**Escalations**
420	2

Agents that do the work

01 Voice agents

02 Follow-up

03 Booking

04 Reactivation

05 Reporting

The usual objection

Why not a freelancer?

Language: we build in English, Arabic and Urdu. A real startups case is added with the first build in this field.

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

THE CREW

SEVEN AGENTS. ONE JOB EACH.

Each is a pattern on the same seven-by-seven grid of studs, the same studs that make our C. Their personality is in how they move, not in a face.

ONE SYSTEM Our C is built from the same studs as the crew: two rings and a centre stud, with a gap on the right. The logo and the agents are one family.

01

Aria

Answers calls

"Picks up in one ring."

DOES Picks up in one ring, asks what the caller needs, checks your calendar and books it.

02

Echo

Follows up

"Sent. Sending again, politely."

DOES Replies to every enquiry within seconds and keeps the thread going until a person is needed.

03

Slot

Books the slot

"Thursday, 10:30. Done."

DOES Reads your live calendar, offers two or three slots, books, confirms and reminds.

04

Boomerang

Wins customers back

"Remember us? We saved you a seat."

DOES Writes a short personal message to customers who stopped coming and offers the ones who reply a slot.

05

Tally

Reports the week

"Here is the week in one minute."

DOES Turns every call and booking into one plain summary you can read in a minute.

06

Gate

Hands over to a human

"This one needs a person. Passing it on."

DOES Knows when a call needs a person, passes it on with a short summary and logs what happened.

07

Ledger

Keeps the receipts

"Every number has a source."

DOES Records where every published number came from, so nothing is claimed that cannot be traced.

Voice lines are sample copy for the agents, not customer quotes.

Want a crew of your own?

We pick the one or two that fix your biggest leak and start there.

WORK

BUILT, SHIPPED, RUNNING.

First case studies are being written with our pilot clients.

What you will find here

Each case shows a screenshot or loop, one metric and where it came from, the problem, the solution and what we would do differently. We publish only what a client has agreed we can share.

Until then

Hear the agent on the demos page, follow our numbers on the receipts page, or see how a build works on the studio page.

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

DEMOS

TRY IT, DON'T TAKE OUR WORD.

Talk to it, then count what a missed call costs you.

TALK TO ARIA

A voice agent for a sample clinic

Type or use the mic. It answers, says how fast, and hands over to a person when asked. Nothing is booked for real.

Aria demo
English
Voice on

Hi, I'm Aria, a demo voice agent for a sample clinic. Ask me to book a check-up, or ask about opening hours.

Can I book a check-up?
Are you open Saturday?
Can I talk to a person?

Type, or press the mic
Mic
Send

ANSWERED IN
Ask something

RUNNING ON
Not started

VOICE
Your browser's speech tools

Nothing is booked for real. Demo mode answers in English; Arabic and Urdu need the live model and a browser that supports those voices. Book a call to hear a real build.

CALCULATOR

What does a missed call cost you?

Your numbers in, the working shown line by line.

Starting values are examples. Replace them with your own; the working below updates as you type.

Calls you miss in a week
10
Check your phone log for a typical week.

Share that would have booked
30 %
Out of 100 callers, how many book when you do pick up?

Average value of a visit
100
In your own currency.

Share an agent could answer
70 %
Your assumption. Urgent or unusual calls still go to a person.

WITHIN REACH EACH YEAR

10,920

An estimate from your inputs, not a promise.

10 missed calls a week × 30% who would have booked	3.0 bookings a week
3.0 bookings × 4.33 weeks × 100 per visit	1,300 a month
1,300 × 12 months	15,600 a year left on the table
15,600 × 70% an agent could answer	10,920 a year within reach

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

ABOUT

AGENTS, CONVENED.

A conclave is a closed room where a small group reaches one decision. We convene small, specific agents the same way: each with one job, working together so your business never misses a call.

Fixed scope

You know what you get and what it costs before we start.

One job per agent

A council of narrow agents beats one fragile mega-bot. Small agents are easier to test, trust and fix.

Product later

What we repeat for clients becomes software.

PRICING

PILOT, BUILD, RETAINER.

Fixed scope, quoted on a call. Start with a 14-day pilot and see it work before you commit to more.

PILOT

Prove it on one line

One agent, one job
A 14-day pilot, scoped up front
Weekly summary

SCOPED ON A CALL

Book a call

BUILD

Fixed scope, fixed fee

Agent plus integrations
Your calendar and CRM
Handover and training

SCOPED ON A CALL

Book a call

RETAINER

We run it for you

Monitoring and tuning
New flows each month
Priority support

SCOPED ON A CALL

Book a call

Agent, receptionist or answering service?

What you need	Voice agent	Receptionist	Answering service
Answers every call	Yes, in the hours you set	During their shift	Usually, on their terms
Knows your calendar	Reads it live	Yes	Often takes a message instead
Hands over to a person	Yes, with a summary	They are the person	Yes
How it is billed	Fixed scope, quoted on a call	Salary	Varies by provider

Typical cases, not any named provider. The full comparison is on the compare page.

What is included

One agent, one job	Pilot, Build, Retainer
Your calendar and CRM connected	Build, Retainer
Handover and training	Build, Retainer
Weekly one-page summary	Pilot, Build, Retainer
Monitoring and tuning	Retainer
New flows each month	Retainer

Wondering how this compares with hiring a receptionist or an agency? See the comparison.

Questions about pricing

- Will callers know it is an AI?
- What happens when the agent cannot help?
- Does it work with our calendar and booking tool?
- How is patient or customer data handled?
- How long until it is live?
- Which languages does it speak?
- Do you handle health data, and what about HIPAA?
- Do I own the code?
- What if the agent is wrong?
- How is this different from a freelancer or a no-code flow?

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

JOIN

THE CONCLAVE AI GUILD.

Engineers who like small agents, boring infrastructure and shipping on a Friday.

Careers

No open roles are listed yet. When we hire, they appear here with the stack, the pay model and how we work. Until then, send a short note and a link to your best work.

Write to us

Partner programme

Vetted freelancers and engineers take pilot work with us on revenue share. You build one job well; we handle scoping, the client and the infrastructure underneath.

Ask about partnering

Open-source templates

A voice agent starter, a retrieval starter and a booking agent starter, published on GitHub so you can judge the code before you ever talk to us. Repositories are linked here when they are public.

Bounties

Small, paid tasks with clear acceptance tests, posted on the receipts page next to the build logs.

Prefer to hire us?

If you are here as a client rather than a candidate, start with a call.

SECURITY

CALM ANSWERS TO THE RISKY QUESTIONS.

The principles we build to. The specifics for your project are agreed in writing before we start.

Data we handle

Only what the agent needs to do its job, stored in an access-controlled database you can audit.

Consent and recording

Call recording is off unless you turn it on, and the consent wording is agreed in writing first.

Who can see it

Named people on your team and ours. Access is removed when a project ends.

Subprocessors

The services we build on are listed here and in your project scope. You approve any change.

Model training

We do not use your customers' data to train models. This is written into the project agreement.

When the agent is unsure

It hands over to a person and keeps a log of what happened.

This page is a plain-language summary, not a certification. We do not claim certifications we do not hold. Questions about a specific requirement: write to us before you buy.

Need it in writing?

Ask for the data handling terms for your project before the first call is booked.

COMPARE

PICK THE RIGHT TOOL, EVEN IF IT IS NOT US.

A flow, a freelancer, an agency and a receptionist each fit some jobs. Here is where.

What you need	Conclave AI	Freelancer	n8n or no-code flow	Big agency	In-house receptionist
Live demo before you hire	**Rarely**	Sometimes	Rarely	Not applicable	
Scope and price known up front	**Often**	Often	Rarely	Salary	
Monitoring, retries and handover	**Varies**	You build it	Yes	Not applicable	
You own the code	**Varies**	You own the flow	Varies	Not applicable	
Works at 6pm on a Friday	**Varies**	Until it fails	Yes	Shift hours	
Time to first live version	**14-day pilot**	Days	Weeks to months	Weeks to hire	

Entries describe typical cases, not any named company. We use n8n where it fits, and a freelancer is often the right call for a small, one-off flow.

Not sure which fits?

Tell us the job. If another route suits you better, we will say so.

RECEIPTS

RECEIPTS, NOT CLAIMS.

Big firms hide behind logos. We publish the numbers and the build logs, once they exist and are real.

The ledger

METRIC	SOURCE	STATUS
Time to answer a call	Demo line call logs	Starts with the first live demo
Bookings made by the agent	Calendar entries created	Starts with the first pilot
Hours saved per week	Call and message logs	Starts with the first pilot
Build time per agent	Our own build logs	Published with each case

Build logs

Short, dated entries: what we built, what broke, what we changed. The first one is posted with the first pilot.

The rules

- Every number links to where it came from.
- No client is named until they agree.
- A figure is dated, and a stale one is marked as such.

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

MISSED-CALL MATH

WHAT A MISSED CALL REALLY COSTS A CLINIC

A four-line formula you can run on your own phone log in five minutes, with a worked example.

2026-10-22 · CONCLAVE AI

Most owners know calls are being missed. Few know what that is worth, because the number sounds too awkward to measure. It is not. You need four inputs and a phone log.

The formula

Missed calls per week × share that would have booked	**bookings lost per week**
bookings lost per week × 4.33 weeks	**bookings lost per month**
bookings lost per month × average value of a visit	**revenue lost per month**
revenue lost per month × 12	**revenue lost per year**

A worked example (made-up round numbers, not our data)

10 missed calls × 30%	**3 bookings lost per week**
3 × 4.33	**about 13 bookings lost per month**
13 × 100 per visit	**about 1,300 lost per month**
1,300 × 12	**about 15,600 lost per year**

Those inputs are examples to show the method. Your numbers will differ, and that is the point of running it on yours.

Where each input comes from

- Missed calls per week: your phone provider's call log, filtered to unanswered inbound calls, for a normal week.
- Share that would have booked: of the calls you do answer, the fraction that end in a booking. Your booking system has it.
- Average value of a visit: total revenue from visits divided by number of visits, over the same period.

What an agent changes, and what it does not

A voice agent answers the call in one ring, so fewer calls go unanswered. It does not change how many callers would have booked, and it will not catch every call: urgent or unusual ones should still reach a person. So treat the share an agent could answer as your own assumption, and test it in a short pilot before relying on it.

Run it on your own numbers

All notes

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

ROADMAP

WHAT SHIPPED, WHAT IS NEXT.

Plain and dated by order, not by promise. Items move left as they ship.

SHIPPED

- Voice, follow-up, booking, reactivation and reporting service pages
- Studio, industries, compare, security and receipts pages
- Aria demo (demo mode) and the missed-call calculator
- Contact form with spam protection
- The stud crew and the stud C mark

BUILDING NOW

- Live voice with the AI model and a phone demo line
- Case studies with real results
- Calendar booking on the contact page

LATER

- Convene game and the build-your-own-agent wizard, once polished
- Public build logs and bounties
- Open-source agent templates
- More Notes, weekly for the first eight weeks
- A yearly Agent Radar

Something you need that is not here? Tell us.

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

01 **Fixed scope**
You know what you get before we start.

02 **You own the code**
Handover and training are part of every build.

03 **Live in 14 days**
A pilot is planned for 14 days, scoped up front.

SERVICES

From the first ring to the booked slot, one agent for each job

01

Voice agents that answer every call

Picks up in one ring, in the caller's language, and never puts anyone on hold.

How it works

Call answered EXAMPLE

Hi, I'd like to book a cleaning this week.

Of course. I have Thursday at 10:30 or Friday at 2.

02

Follow-up in seconds, not days

Every enquiry gets a reply while the lead is still looking at their phone.

How it works

New enquiry EXAMPLE

Do you have any appointments left today?

Yes, 4:15 pm is open. Want me to hold it for you?

Yes please.

03

Bookings straight into your calendar

The agent checks real availability and books the slot, with no back and forth.

How it works

This week EXAMPLE

Mon Tue Wed Thu Fri

04

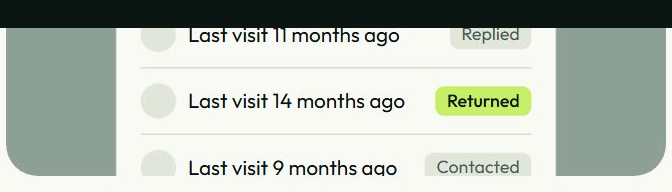
Reactivation of lapsed customers

Quietly reaches out to people who stopped coming, and brings the right ones back.

How it works

Lapsed customers EXAMPLE

Last visit 8 months ago Returned



05

Reporting you can read in a minute

Calls answered, slots booked and revenue recovered, in one plain weekly summary.

SERVICE 01

VOICE AGENTS THAT ANSWER EVERY CALL

Picks up in one ring, in the caller's language, and never puts anyone on hold.

THE PROBLEM

Calls that ring out are customers you paid to attract and then lost.

Call answered EXAMPLE

Hi, I'd like to book a cleaning this week.

Of course. I have Thursday at 10:30 or Friday at 2.

Thursday works.

Answered in 1 ring 00:42

How a call flows

1. Caller rings your number
2. Aria answers in one ring and asks what they need
3. She checks real availability
4. The slot is booked and a text confirms it
5. Anything she cannot handle goes to a person with a summary

Works with

Twilio · Vapi · LiveKit · Google Calendar · Cal.com · Your CRM

Not on the list? If the tool has an API, we can usually connect it.

Price and timeline

Starts as a 14-day pilot. Scope and price are fixed on a call before any work begins, so there are no surprises.

Questions

- Will callers know it is an AI?
- Which languages?
- Are calls recorded?

Hear it on the demo page, then see the clinic case.

Next: Follow-up

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

SERVICE 02

FOLLOW-UP IN SECONDS, NOT DAYS

Every enquiry gets a reply while the lead is still looking at their phone.

THE PROBLEM

An enquiry answered after an hour is usually an enquiry lost.

How a call flows

1. A form, message or missed call arrives
2. The agent replies within seconds in your tone
3. It answers the first questions and offers a slot
4. It keeps the thread going until a person is needed

Works with

WhatsApp · SMS · Email · Web forms · Instagram · Your CRM

Not on the list? If the tool has an API, we can usually connect it.

Price and timeline

Starts as a 14-day pilot. Scope and price are fixed on a call before any work begins, so there are no surprises.

Questions

- Does it message people who did not ask?
- Can I approve messages first?
- What if the lead replies angrily?

Pairs with booking so the reply ends in a calendar slot.

Next: Booking

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

Book a call · Hear a live agent

AGENTS, CONVE

© 2026 Conclave AI

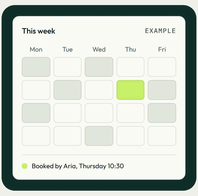
SERVICE 03

BOOKINGS STRAIGHT INTO YOUR CALENDAR

The agent checks real availability and books the slot, with no back and forth.

THE PROBLEM

Booking by back and forth costs minutes every time and loses people on the way.



How a call flows

1. The agent asks what and when
2. It reads your real calendar
3. It offers two or three slots
4. It books, confirms and reminds
5. It handles the reschedule too

Works with

Google Calendar · Outlook · Cal.com · Practice software · Stripe deposits

Not on the list? If the tool has an API, we can usually connect it.

Price and timeline

Starts as a 14-day pilot. Scope and price are fixed on a call before any work begins, so there are no surprises.

Questions

- Does it double-book?
- Can it take a deposit?
- What about staff holidays?

Built on the same calendar link as the voice agent.

Next: Reactivation

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

Book a call | Hear a live agent

AGENTS, CONVE

© 2026 Conclave AI

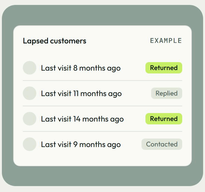
SERVICE 04

REACTIVATION OF LAPSED CUSTOMERS

Quietly reaches out to people who stopped coming, and brings the right ones back.

THE PROBLEM

Your best next customers are the ones who already came once and quietly stopped.



How a call flows

1. We pull a list of lapsed customers you choose
2. The agent writes a short personal message
3. People who reply are offered a slot
4. People who decline are never contacted again

Works with

CRM export · SMS · WhatsApp · Email · Cal.com

Not on the list? If the tool has an API, we can usually connect it.

Price and timeline

Starts as a 14-day pilot. Scope and price are fixed on a call before any work begins, so there are no surprises.

Questions

- Is this spam?
- How many messages go out?
- Can we exclude people?

The weekly report shows who came back.

Next: Reporting

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

Book a call | Hear a live agent

AGENTS, CONVE

© 2026 Conclave AI

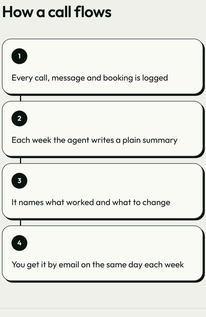
SERVICE 05

REPORTING YOU CAN READ IN A MINUTE

Calls answered, slots booked and revenue recovered, in one plain weekly summary.

THE PROBLEM

If you cannot read the results in a minute, you will stop reading them.



How a call flows

1. Every call, message and booking is logged
2. Each week the agent writes a plain summary
3. It names what worked and what to change
4. You get it by email on the same day each week

Works with

Resend email · Supabase · Looker Studio · Slack

Not on the list? If the tool has an API, we can usually connect it.

Price and timeline

Starts as a 14-day pilot. Scope and price are fixed on a call before any work begins, so there are no surprises.

Questions

- Which numbers are shown?
- Can I export the data?
- Who reads the report with me?

This is where the Receipts page gets its numbers.

Next: Voice agents

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

STUDIO / AGENTS

AGENTS THAT TAKE THE CALLS

Calls that ring out and enquiries that wait are customers you paid to attract and then lost.

What we build

- Voice agents that answer, ask what is needed and book
- Follow-up that replies to every enquiry in seconds
- Booking against your real calendar
- Reactivation of customers who stopped coming
- A weekly report you can read in a minute

How it runs

1. A call or message arrives
2. The agent answers and asks what is needed
3. It checks your live calendar
4. It books, confirms and reminds
5. Anything it cannot handle goes to a person with a summary

Timeline, price and stack

TIMELINE

14-day pilot

PRICE FROM

Scoped on a call, fixed before we start

STACK

Vapi · LiveKit · OpenAI

Questions

- How long is the pilot?
- Which languages?
- Do I own it?

See the five service pages for each job in detail.

Next: Automations

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

WORKFLOWS THAT MOVE YOUR DATA

Your team re-types the same details between tools, and things fall through the gaps between them.

What we build

- Lead captured, then added to the CRM, answered and a task created
- Invoices and reminders sent on a schedule
- Reports assembled and emailed each week
- Alerts when something looks wrong
- Clean hand-offs between your apps

How it runs

1. A trigger fires (a form, an email, a payment, a schedule)
2. The data is checked and cleaned
3. The right tool is updated
4. The right person is told
5. Failures retry, then raise an alert

Timeline, price and stack

TIMELINE

1 to 2 week build

PRICE FROM

Scoped on a call, fixed before we start

STACK

n8n · Webhooks · Zapier · APIs

Questions

- n8n, Zapier or code?
- What happens when a step fails?
- How long does a workflow take?

Pairs with Agents: an agent takes the call, an automation does the follow-through.

Next: ERP and CRM

Hear it, then book it.

STUDIO / APPS

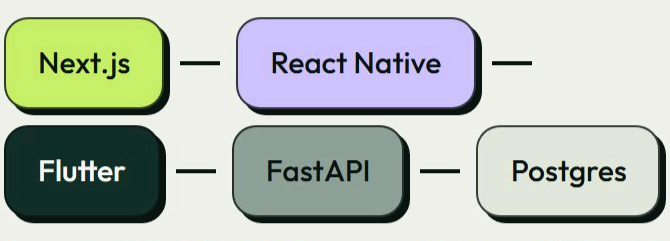
APPS WITH AGENT FEATURES

You need a product, or a site, that works on a phone and does something clever without a fragile pile of plug-ins.

What we build

- Web apps and dashboards
- Mobile apps in React Native or Flutter
- Agent features inside the app: copilots, search over your documents, tool use
- Marketing sites with a headless CMS, SEO and booking built in

What it is built with



Built with these. The order shown is illustrative; a full architecture diagram is added with each write-up.

Marketing sites, when you need a face

Animated Next.js sites with a headless CMS, SEO and booking built in, scoped as one milestone and handed over so your team can edit them.

FOR CLINICS

A FRONT DESK THAT NEVER STEPS AWAY

Calls go unanswered while the front desk is with a patient.

Three workflows we set up first

1. Answer and triage the call
2. Book, move or cancel in your calendar
3. Text a reminder and a follow-up

What the week looks like

A sample weekly summary for clinics. Figures are examples to show the shape, not results.

A week at a clinic EXAMPLE

Calls answered	Appointments booked
128	41
Reminders sent	**Handed to staff**
96	7

Agents that do the work

01 Voice agents

02 Follow-up

03 Booking

04 Reactivation

05 Reporting

The usual objection

Will patients accept an AI?

Language: we build in English, Arabic and Urdu. A real clinics case is added with the first build in this field.

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

THE CREW

SEVEN AGENTS. ONE JOB EACH.

Each is a pattern on the same seven-by-seven grid of studs, the same studs that make our C. Their personality is in how they move, not in a face.

ONE SYSTEM Our C is built from the same studs as the crew: two rings and a centre stud, with a gap on the right. The logo and the agents are one family.

01

Aria

Answers calls

"Picks up in one ring."

DOES Picks up in one ring, asks what the caller needs, checks your calendar and books it.

02

Echo

Follows up

"Sent. Sending again, politely."

DOES Replies to every enquiry within seconds and keeps the thread going until a person is needed.

03

Slot

Books the slot

"Thursday, 10:30. Done."

DOES Reads your live calendar, offers two or three slots, books, confirms and reminds.

04

Boomerang

Wins customers back

"Remember us? We saved you a seat."

DOES Writes a short personal message to customers who stopped coming and offers the ones who reply a slot.

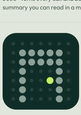
05

Tally

Reports the week

"Here is the week in one minute."

DOES Turns every call and booking into one plain summary you can read in a minute.



06

Gate

Hands over to a human

"This one needs a person. Passing it on."

DOES Knows when a call needs a person, passes it on with a short summary and logs what happened.

07

Ledger

Keeps the receipts

"Every number has a source."

DOES Records where every published number came from, so nothing is claimed that cannot be traced.

Voice lines are sample copy for the agents, not customer quotes.

Want a crew of your own?

We pick the one or two that fix your biggest leak and start there.

WORK

BUILT, SHIPPED, RUNNING.

First case studies are being written with our pilot clients.

What you will find here

Each case shows a screenshot or loop, one metric and where it came from, the problem, the solution and what we would do differently. We publish only what a client has agreed we can share.

Until then

Hear the agent on the demos page, follow our numbers on the receipts page, or see how a build works on the studio page.

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

DEMOS

TRY IT, DON'T TAKE OUR WORD.

Talk to it, then count what a missed call costs you.

TALK TO ARIA

A voice agent for a sample clinic

Type or use the mic. It answers, says how fast, and hands over to a person when asked. Nothing is booked for real.

Aria demo | English | Voice on

Hi, I'm Aria, a demo voice agent for a sample clinic. Ask me to book a check-up, or ask about opening hours.

Can I book a check-up?

Are you open Saturday?

Can I talk to a person?

Type, or press the mic | Mic | Send

ANSWERED IN
Ask something

RUNNING ON
Not started

VOICE
Your browser's speech tools

Nothing is booked for real. Demo mode answers in English; Arabic and Urdu need the live model and a browser that supports those voices. Book a call to hear a real build.

CALCULATOR

What does a missed call cost you?

Your numbers in, the working shown line by line.

Starting values are examples. Replace them with your own; the working below updates as you type.

Calls you miss in a week

10

Check your phone log for a typical week.

Share that would have booked

30 %

Out of 100 callers, how many book when you do pick up?

Average value of a visit

100

In your own currency.

Share an agent could answer

70 %

Your assumption. Urgent or unusual calls still go to a person.

WITHIN REACH EACH YEAR

10,920

An estimate from your inputs, not a promise.

10 missed calls a week × 30% who would have booked
3.0 bookings a week

3.0 bookings × 4.33 weeks × 100 per visit
1,300 a month

1,300 × 12 months — **15,600 a year left on the table**

15,600 × 70% an agent could answer
10,920 a year within reach

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

Conclave AI MENU

ABOUT

AGENTS, CONVENED.

A conclave is a closed room where a small group reaches one decision. We convene small, specific agents the same way: each with one job, working together so your business never misses a call.

Fixed scope

You know what you get and what it costs before we start.

One job per agent

A council of narrow agents beats one fragile mega-bot. Small agents are easier to test, trust and fix.

Product later

What we repeat for clients becomes software.

PRICING

PILOT, BUILD, RETAINER.

Fixed scope, quoted on a call. Start with a 14-day pilot and see it work before you commit to more.

PILOT

Prove it on one line

One agent, one job
A 14-day pilot, scoped up front
Weekly summary

SCOPED ON A CALL

Book a call

BUILD

Fixed scope, fixed fee

Agent plus integrations
Your calendar and CRM
Handover and training

SCOPED ON A CALL

Book a call

RETAINER

We run it for you

Monitoring and tuning
New flows each month
Priority support

SCOPED ON A CALL

Book a call

Agent, receptionist or answering service?

What you need	Voice agent	Receptio
Answers every call	Yes, in the hours you set	During th shift
Knows your calendar	Reads it live	Yes
Hands over to a person	Yes, with a summary	They are person
How it is billed	Fixed scope, quoted on a call	Salary

Typical cases, not any named provider. The full comparison is on the compare page.

What is included

One agent, one job	Pilot, Build
Your calendar and CRM connected	Build, Retc
Handover and training	Build, Retc
Weekly one-page summary	Pilot, Build
Monitoring and tuning	Retainer
New flows each month	Retainer

Wondering how this compares with hiring a receptionist or an agency? See the comparison.

Questions about pricing

- Will callers know it is an AI?
- What happens when the agent cannot help?
- Does it work with our calendar and booking tool?
- How is patient or customer data handled?
- How long until it is live?
- Which languages does it speak?
- Do you handle health data, and what about HIPAA?
- Do I own the code?
- What if the agent is wrong?
- How is this different from a freelancer or a no-code flow?

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

JOIN

THE CONCLAVE AI GUILD.

Engineers who like small agents, boring infrastructure and shipping on a Friday.

Careers

No open roles are listed yet. When we hire, they appear here with the stack, the pay model and how we work. Until then, send a short note and a link to your best work.

Write to us

Partner programme

Vetted freelancers and engineers take pilot work with us on revenue share. You build one job well; we handle scoping, the client and the infrastructure underneath.

Ask about partnering

Open-source templates

A voice agent starter, a retrieval starter and a booking agent starter, published on GitHub so you can judge the code before you ever talk to us. Repositories are linked here when they are public.

Bounties

Small, paid tasks with clear acceptance tests, posted on the receipts page next to the build logs.

Prefer to hire us?

If you are here as a client rather than a candidate, start with a call.

THE CONCLAVE AI GUILD.
Engineers who like small agents, boring infrastructure and shipping on a Friday.

Careers

No open roles are listed yet. When we hire, they appear here with the stack, the pay model and how we work. Until then, send a short note and a link to your best work.

Write to us

Partner programme

Vetted freelancers and engineers take pilot work with us on revenue share. You build one job well; we handle scoping, the client and the infrastructure underneath.

Ask about partnering

Open-source templates

SECURITY

CALM ANSWERS TO THE RISKY QUESTIONS.

The principles we build to. The specifics for your project are agreed in writing before we start.

Data we handle

Only what the agent needs to do its job, stored in an access-controlled database you can audit.

Consent and recording

Call recording is off unless you turn it on, and the consent wording is agreed in writing first.

Who can see it

Named people on your team and ours. Access is removed when a project ends.

Subprocessors

The services we build on are listed here and in your project scope. You approve any change.

Model training

We do not use your customers' data to train models. This is written into the project agreement.

When the agent is unsure

It hands over to a person and keeps a log of what happened.

This page is a plain-language summary, not a certification. We do not claim certifications we do not hold. Questions about a specific requirement: write to us before you buy.

Need it in writing?

Ask for the data handling terms for your project before the first call is booked.

COMPARE

PICK THE RIGHT TOOL, EVEN IF IT IS NOT US.

A flow, a freelancer, an agency and a receptionist each fit some jobs. Here is where.

What you need	Conclave AI	Freelancer
Live demo before you hire	Rarely	Sometimes
Scope and price known up front	Often	Often
Monitoring, retries and handover	Varies	You build it
You own the code	Varies	You own the flow
Works at 6pm on a Friday	Varies	Until it fails
Time to first live version	14-day pilot	Days

Entries describe typical cases, not any named company. We use n8n where it fits, and a freelancer is often the right call for a small, one-off flow.

Not sure which fits?

Tell us the job. If another route suits you better, we will say so.

RECEIPTS

RECEIPTS, NOT CLAIMS.

Big firms hide behind logos. We publish the numbers and the build logs, once they exist and are real.

The ledger

METRIC	SOURCE
Time to answer a call	Demo line call logs
Bookings made by the agent	Calendar entries created
Hours saved per week	Call and message logs
Build time per agent	Our own build logs

Build logs

Short, dated entries: what we built, what broke, what we changed. The first one is posted with the first pilot.

The rules

- Every number links to where it came from.
- No client is named until they agree.
- A figure is dated, and a stale one is marked as such.

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

MISSED-CALL MATH

WHAT A MISSED CALL REALLY COSTS A CLINIC

A four-line formula you can run on your own phone log in five minutes, with a worked example.

2026-10-22 · CONCLAVE AI

Most owners know calls are being missed. Few know what that is worth, because the number sounds too awkward to measure. It is not. You need four inputs and a phone log.

The formula

Missed calls per week × share that would have booked	**bookings lost per week**
bookings lost per week × 4.33 weeks	**bookings lost per month**
bookings lost per month × average value of a visit	**revenue lost per month**
revenue lost per month × 12	**revenue lost per year**

A worked example (made-up round numbers, not our data)

10 missed calls × 30%	**3 bookings lost per week**
3 × 4.33	**about 13 bookings lost per month**
13 × 100 per visit	**about 1,300 lost per month**
1,300 × 12	**about 15,600 lost per year**

Those inputs are examples to show the method. Your numbers will differ, and that is the point of running it on yours.

Where each input comes from

- Missed calls per week: your phone provider's call log, filtered to unanswered inbound calls, for a normal week.
- Share that would have booked: of the calls you do answer, the fraction that end in a booking. Your booking system has it.
- Average value of a visit: total revenue from visits divided by number of visits, over the same period.

What an agent changes, and what it does not

A voice agent answers the call in one ring, so fewer calls go unanswered. It does not change how many callers would have booked, and it will not catch every call: urgent or unusual ones should still reach a person. So treat the share an agent could answer as your own assumption, and test it in a short pilot before relying on it.

Run it on your own numbers

All notes

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.

ROADMAP

WHAT SHIPPED, WHAT IS NEXT.

Plain and dated by order, not by promise. Items move left as they ship.

SHIPPED

- Voice, follow-up, booking, reactivation and reporting service pages
- Studio, industries, compare, security and receipts pages
- Aria demo (demo mode) and the missed-call calculator
- Contact form with spam protection
- The stud crew and the stud C mark

BUILDING NOW

- Live voice with the AI model and a phone demo line
- Case studies with real results
- Calendar booking on the contact page

LATER

- Convene game and the build-your-own-agent wizard, once polished
- Public build logs and bounties
- Open-source agent templates
- More Notes, weekly for the first eight weeks
- A yearly Agent Radar

Something you need that is not here? Tell us.

Hear it, then book it.

A short call. We listen first and tell you honestly if an agent will help.
